

**EXPECTED
SPIKEVAX[®]
2025–2026
FORMULA**

**PRODUCT
OVERVIEW***

Reserve the 2025–2026 formula today.

*Spikevax (2025–2026 Formula) has not been FDA authorized or approved and will require authorization or approval prior to sale. Information is subject to change.

INDICATION

SPIKEVAX (COVID-19 Vaccine, mRNA) is a vaccine indicated for active immunization to prevent coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) in individuals 12 years of age and older.

IMPORTANT SAFETY INFORMATION

Contraindications

Do not administer SPIKEVAX to individuals with a known history of severe allergic reaction (e.g., anaphylaxis) to any component of SPIKEVAX or to individuals who had a severe allergic reaction (e.g., anaphylaxis) following a previous dose of a Moderna COVID-19 vaccine.

Please see continued IMPORTANT SAFETY INFORMATION throughout, and scan or click the QR code on page 4 for Spikevax Full Prescribing Information.

Expected Product Information^{1*}

Spikevax® (2025–2026 Formula) Expected Presentation **PRE-FILLED SYRINGE**

Storage and handling information for the 2025–2026 presentation will be shared when available.

*Spikevax (2025–2026 Formula) has not been FDA authorized or approved and will require authorization or approval prior to sale. Information is subject to change.

IMPORTANT SAFETY INFORMATION (CONT.)

Warnings and Precautions

- **Management of Acute Allergic Reactions:** Appropriate medical treatment must be immediately available to manage potential anaphylactic reactions following administration of SPIKEVAX.
- **Myocarditis and Pericarditis:** Postmarketing data demonstrate increased risks of myocarditis and pericarditis, particularly within the first week following vaccination. The observed risk is highest in males 18 through 24 years of age.
- **Syncope (fainting):** May occur in association with administration of injectable vaccines. Procedures should be in place to avoid injury from fainting.

- **Syncope (fainting):** May occur in association with administration of injectable vaccines. Procedures should be in place to avoid injury from fainting.
- **Altered Immunocompetence:** Immunocompromised persons, including individuals receiving immunosuppressive therapy, may have a diminished immune response to SPIKEVAX.
- **Limitations of Vaccine Effectiveness:** SPIKEVAX may not protect all vaccine recipients.

Adverse Reactions

The most commonly reported ($\geq 10\%$) adverse reactions following any dose in any indicated patient population were pain at the injection site, fatigue, headache, myalgia, chills, arthralgia, axillary swelling/tenderness, nausea/vomiting, and swelling at the injection site.

Reporting Adverse Events and Vaccine Administration Errors

To report suspected adverse reactions, contact ModernaTX, Inc. at 1-866-663-3762 or VAERS at 1-800-822-7967 or <https://vaers.hhs.gov>.
